The image shows the 'Export to Video' dialog box in Microsoft PowerPoint. The dialog has a title bar '导出到视频' and a progress indicator with steps 1, 2, and 3. The main text explains that most people can view the Mix online, but it also allows for creating downloadable videos. It lists three video quality options: Full HD (1080p), Computer and High Definition (720p), and Portable (240p). The 'Portable (240p)' option is highlighted with a red dashed box. Below the options, there is a field for 'Long slide duration in seconds' set to 5. At the bottom, there are 'Next Step' and 'Close' buttons. A yellow callout bubble points to the 'Export and Record Video' button in the PowerPoint ribbon. An orange arrow points from the 'Portable (240p)' option to a 'Save As' dialog box, which shows the file name '演示文稿1' and the format 'MP4'.
